System expert Buderus has further optimised its proven Logano plus KB192i gas condensing boiler: The new generation of the floor-standing heat generator features improved combustion and electronics for even more efficient and convenient operation. The Logano plus KB192i now offers a modulation ratio of up to 1:10 (previously 1:7) and comes with the innovative Logamatic BC400 system control unit. The heat generator can moreover be expanded into a hybrid system.

Buderus, one of Europe's strongest brands in the thermotechnology sector, is a provider of efficient and reliable system solutions for heating, ventilation and cooling. As a systems expert for heating and installation technology, Buderus is distinguished by its consulting expertise, integrated services and perfectly matched energy-efficient and connectable heating systems from a single source. The product portfolio covers everything from heat generators for liquid and gaseous energy sources to storage tanks, controls and heating accessories to a comprehensive range of renewable energy systems such as heat pumps and solar thermal systems.

All Buderus products offer maximum system compatibility, as all components are perfectly matched. This enables trade partners to install individual solutions quickly and efficiently, both in new and existing buildings, regardless of whether the system is large or small.
